Pallav Das

Data Scientist and AI Engineer

(+91) 8595526356 | pallobdas07@gmail.com | ProfessionalPallav20014 | pallav-das-83b185314

Education

Dr. Akhilesh Das Gupta Institute of Professional Studies — *New Delhi, India*

Bachelor of Technology in Artificial Intelligence and Machine Learning, CGPA: 9.2 — *2024 – Present*

Skills

Languages	Python, SQL, Java, C
ML / DL	PyTorch, TensorFlow, Scikit-learn, XGBoost, LightGBM
Generative AI	Hugging Face Transformers, LangChain, LangGraph, RAG, Agentic AI
Data Science	Pandas, NumPy, Matplotlib, Seaborn
Vector DB / LLM Tools	FAISS, Ollama

Experience

XYlofy AI — *Bengaluru, Karnataka*

Data Science Intern — *June 2026 - 3 mos*

- Developed a multi-page data analytics application to visualize and analyze yearly sales trends.
- Implemented SARIMAX time-series forecasting to predict future product prices and identify pricing trends.
- Applied Isolation Forest for anomaly detection and analyzed anomalous observations to identify potential causes and patterns.
- Implemented K-Means clustering to segment product demand within specific categories and sub-categories.

Projects

Netflix Inspired Recommendation System

- Developed a personalized movie recommendation engine using Python and Streamlit, implementing content-based filtering with cosine similarity to generate Netflix-style movie recommendations.

Superstore Sales Forecasting

- Developed a multi-page sales analytics application to visualize yearly sales trends, forecast future prices using SARIMAX, detect anomalies using Isolation Forest, and perform K-Means clustering for product demand segmentation.

RAG-Based YouTube Video Summarizer

- Built a Retrieval-Augmented Generation (RAG) application that enables users to interact with YouTube videos through intelligent summarization and question answering, supporting local LLMs via Ollama and Langchain, and cloud-based APIs like Gemini.

Certifications

XYlofy AI — *Remote*

AI and Data Science – Project-Based Internship — *June – July 2026*

- Completed a 4-week project-based internship focused on Artificial Intelligence and Data Science.

J.P. Morgan – Forage — *Virtual*

Quantitative Research Job Simulation — *July 2026*

- Analyzed a loan portfolio to estimate probability of default and assess credit risk.
- Applied dynamic programming to categorize FICO scores for default prediction analysis.

Code with Harry

The Ultimate Job Ready Data Science Course

- Completed comprehensive coursework covering Python, data analysis, machine learning, and practical Data Science workflows.
